Subject: RE: West Texas Fertilizer fact sheet - any updates needed?
Date: Monday, May 20, 2013 3:51:24 PM

Thanks David. When I looked at the factsheet, one of the things that made me want an update was this reference "As of early April 22, monitoring results did not exceed actionable levels". Did we do further monitoring? Did we stop monitoring? It infers that the fact sheet is a month old. And did the referenced April 21 soil samples turn up any results? It would be helpful to have a bullet on what was announced last week. Thanks again.

All,

Here is my proposed update.

David

Attached. Do we need to update re: the interim state/ATF investigation announcement?

I suggest we use the fact sheet developed for Acting Administrator's budget hearing last week. I am cc: Carolyn Levine who pulled together the final for Bob. Carolyn please share a copy with this group.

David
